DÉFINITIONS DES GROUPES

Revue académiques

■ Groupe 0+ (leading journals)

Un petit nombre de revues scientifiques unanimement reconnues au plan international comme étant les meilleures de la discipline. Il s'agit de toute évidence de revues généralistes, de grande tradition et à grand impact académique.

■ Groupe 0 (excellent)

Un petit nombre de revues scientifiques d'excellence, dont le niveau s'approche des revues leaders de la discipline. La majorité des experts s'accordent sur leur grande qualité. Il s'agit essentiellement de revues généralistes.

■ Groupe 1 (very good)

Revue scientifique de très bon niveau, reconnues et diffusées au plan international, sans toutefois faire partie des toutes premières revues de la discipline. On y trouve des revues généralistes et spécialisées.

■ Groupe 2 (good)

Revue scientifique dont la qualité des articles est généralement inférieure à celle des revues du groupe 1. Il s'agit des revues à circulation nationale ou des revues internationales de moindre notoriété.

■ Groupe 3 (narrow)

Revue scientifique à aire de diffusion très étroite ou à faible notoriété.

Revue professionnelles (P)

■ Groupe 3P

Revue professionnelle contenant des articles destinés aux experts du domaine. Leur comité éditorial inclut des personnalités académiques.

■ Groupe 4P

Revue contenant des articles destinés essentiellement à un public professionnel.

GROUPS DEFINED

Academic journals

■ **Group 0+ (leading journals)**

A small number of scientific journals unanimously acknowledged internationally as the best in the field. Naturally these are generalist journals with a longstanding tradition and high academic impact.

■ **Group 0 (excellent)**

A small number of scientific journals offering excellence on a level close to the top journals in the field. Expert opinion is generally in agreement as to their very high quality; they are generalist journals.

■ **Group 1 (very good)**

High-level scientific journals of international reputation and circulation, but not among the very top journals in their field. They comprise both generalist and more specialist journals.

■ **Group 2 (good)**

Scientific journals publishing articles of a generally lower quality than Group 1 journals. Generally national-circulation journals, or international journals of lesser reputation.

■ **Group 3 (narrow)**

Scientific journals with a very narrow circulation or low profile.

Professional journals (P)

■ **Group 3P**

Professional journals containing articles intended for professional experts in the field. Their editorial committee includes academic personalities.

■ **Group 4P**

Journals containing articles essentially intended for readers working in the field.
